

To-Do List Using Python

Objective

To develop a Python application for creating and managing daily tasks.

Problem Statement

Create a menu-driven To-Do List application where users can add, view, mark as completed, and delete tasks.

Features

- Add Task
- View Tasks
- Mark Task as Completed
- Delete Task
- Exit

Algorithm

1. Start
2. Display menu
3. Accept user choice
4. Perform selected operation
5. Repeat until Exit
6. Stop

Python Code (Core Logic)

```
tasks=[]
tasks.append('Complete Python Project')
for task in tasks:
    print(task)
```

Sample Input

Add Task: Complete Assignment

Sample Output

1. Complete Assignment

Conclusion

This project demonstrates list operations, loops, and menu-driven programming for task management.
